CAREER HISTORY

SOFTWARE ENGINEER

Resilient Coders, 2020-present

- Completed assignments individually given by lead engineer
- Collaborated with a team of developers to create web applications using best practices
- Worked on debugging issues individually, and as a team while meeting required deadlines
- Built semantic and responsive websites and projects
- Solved complex web problems using code
- Recent projects include:
    - Creating a mock-up website of today's newspaper articles and other popular sites
    - Making a horoscope application
    - Rock, Paper, Scissors game
    - A slot machine application
    - Interactive full stack websites, requiring the use of Node. js and Mongo DB
    - <u>Meal to Gate</u>: Full stack food delivery website for airport restaurants

FREELANCE

BOSTON, MA 2020- PRESENT

- Engaged with clients to discuss and build websites accessible to all users from scratch, starting with a Mobile First approach
- Worked alongside client to boost website, and provide modern designs, easy to use interfaces, and maintain responsiveness
- Recent projects include:
    - A personal website for a Boston based DJ
    - A responsive website for a new Boston based clothing brand
